Description

In the heart of Ban de Gasperich, a dynamic and growing district, our office building under development Gamma offers a large working area of $\pm 12,000$ m² spread over 12 levels and 150 parking spaces on three basement levels.

For the façade, we chose architectural concrete for an ultra-modern look with glass elements to add a touch of lightness. The verticality of the building is broken from the 6th floor, which has a large terrace, and the rest of the floors are set back.
